

The goal of an Aggregation is to secure lower pricing for a group. Bethlehem Township Board of Trustees would like for residents take advantage of the cost savings of the Townships' Aggregations.

The Township has two Electric Aggregations. One for A.E.P (Ohio Power) and one for Ohio Edison. Our aggregations are with Energy Harbor. You can view what the rates are and you can view more details to make an informed decision. You can also join your aggregation using this website: <https://energyharbor.com/en/community-programs/find-your-program>

Scroll down to Bethlehem Township – Stark County and click on the blue arrow to the right of your utility company.

The A.E.P. (Ohio Power) has two options: Carbon Free (100% emissions free) or Green Energy (100% renewable energy)

In May of 2021, Ohio Edison customers will also have the two options to choose from but for now there is only one option.
